OBJECTIVE

With more than 5 years of experience in electronics, looking to contribute to product excellence and continuous improvement in a dynamic environment.

◇ WORK EXPERIENCE

02-2025 - 09-2026

REL ENGINEER (ONSITE FOR GOOGLE PROJECT)
AMREP VIETNAM. LTD

- Led supplier qualification, process audit, and performance improvement programs from NPI to PVT.
- Contributed to NPI and reliability testing activities for Pixel Phone, supporting product reliability validation from development through PVT.
- Supported failure analysis and issue resolution related to supplier parts and CM processes.
- Coordinated CAPA activities, followed up on issue closure, and ensured supplier compliance with quality standards.
- Supported the bring-up of Miniline stations, monitored overall system-level testing progress, and supported REL/FATP station readiness and lab layout.
- Followed up on build schedules, FATP station build readiness, and waiver lists.
- Supported the bring-up of the Auto X-ray (AXI) system and system-level testing.
- Worked closely cross-functional teams to report quality findings and implement improvement actions.
- Conducted process capability and risk analyses to strengthen supplier manufacturing and reliability capability.

10-2023 - 02-2025

QUALITY ENGINEER
AAC TECHNOLOGIES VIET NAM CO.,LTD

- Managed measurement system analysis (MSA), Gauge R&R, and correlation studies across multiple product builds.
- Supported equipment and fixture buy-off, ensuring GRR, correlation, and loop test results met acceptance criteria.
- Validated process capability (Cp/Cpk) and operational readiness through data analysis and continuous improvement.
- Monitored calibration schedules and verified measurement accuracy through periodic reports.
- Partnered with production and PE teams to establish reliable measurement standards and reduce testing variation.

07-2021 - 10-2023

RELIABILITY CAPTAIN
COMPAL (VIETNAM) CO. LTD

- Performed product reliability and environmental validation tests (Thermal Shock, Vibration, Drop, Cycling, IPX).
- Built up and maintained reliability lab, ensuring test equipment calibration and

Vieclam24h.vn

fixture accuracy.
- Developed detailed reliability test plans, led the team to meet schedule and technical requirements.
- Conducted root cause analysis (RCA) for test failures, collaborated with design and process engineers to implement corrective actions.
- Analyzed reliability test data and prepared validation reports to support product qualification decisions.

◇ EDUCATION

09-2014 - 07-2018

HANOI UNIVERSITY OF INDUSTRY
FOREIGN LANGUAGE

Degree classification: Good

Bachelor

09-2016 - 07-2017

GUANGXI UNIVERSITY OF SCIENCE AND TECHNOLOGY
FOREIGN LANGUAGE

Degree classification: Good

Exchange students

09-2019 - 07-2022

ANHUI UNIVERSITY
INTERNATIONAL TRADE

Degree classification: Good

Master
